

WARUR Colon Combat

Overview:

WARUR's Colon Combat provides the body with essential "friendly bacteria", also called "flora". In the colon, flora is necessary for the proper function of the immune system. When functioning normally, a healthy colon populated with "friendly bacteria" has the ability to develop the necessary antibodies to fight disease and allergies. The modern world lifestyle with all its chemicals, stressful and toxic exposures result in a extremely high rate of attrition of the life-giving, life-protecting "friendly bacteria" leaving them at dangerously low levels where the body becomes more susceptible to disease and chronic conditions.

Low flora levels also contribute to yeast infections, called Candida. It is also a major contributor to "Irritable Bowel Syndrome". Gas, bloating, cramps, and the like are all symptoms of low flora and low enzymes. WARUR's Colon Combat formula ensures plenty of friendly flora and friendly bacteria for optimal health.

Research Indicates:

- Aids in the control of cholesterol
- Boosts immune function
- Helps maintain normal pH levels
- Increases metabolism
- Helps reduce gas and bloating

Suggested Use:

Take 2 capsules per day, with or without food.

All WARUR Products are Electronically Energy Enhanced
