

WARUR Mineral Warrior

Overview:

Mineral Warrior is the foundation weapon in the WARUR battle plan to fight deficiencies. It is unique in its revolutionary approach to powerful nutritional enzyme replenishment, by the combination of plant based enzymes and the essential vitamins and WARUR minerals in each capsule, needed to sustain improved digestive and metabolic function.

When taken immediately after a meal, Mineral Warrior allows a more complete breakdown of food into simple chemical components that can easily be assimilated at the cellular level. This WARUR formula has all the highest-grade vitamins, enzymes, minerals, and trace minerals needed for optimum metabolic function in today's stressful and toxic world. It is more complete and more bio-available than any other nutritional product.

By adding stronger food enzymes to this formula we assure the maximum utilization and benefit of the vitamins and minerals. Mineral Warrior contains **chromium**, which research shows is beneficial in maintaining proper insulin levels, which in turn regulates the glycemic content in the blood. Mineral Warrior replenishes the missing vitamins, minerals, and trace minerals, as well as additional enzymes, which aid in the finer powers of digestion including **peptidase**, which completes the breakdown of proteins from peptides to amino acids and insures that the body can conserve valuable enzyme resources.

Research Indicates:

- Helps proper digestion and metabolic function
- Maximum benefit of the vitamins and minerals
- Improves your general health
- Helps maintains proper insulin levels

Suggested Use:

Take 1-2 capsules with each meal.

All WARUR Products are Electronically Energy Enhanced
