

WARUR Oxi-Warrior

Antioxidants 95%

Overview:

In recent years, our chemical exposure both from bad air and water, as well as, chemicals we eat and put on our bodies, has increased tremendously. This dramatically raises our potential for free radical damage. Free radical damage causes our bodies to age faster than normal and also is linked to over 80 degenerative diseases including cancer and heart disease. A free radical is an extremely active and toxic molecule.

These free radicals are capable of rapid oxidation of tissues, especially fats, which results in excess rancidity, tissue damage and premature and advanced aging. WARUR antioxidants stop free radical damage and boost the immune system. They help your own immune system to recognize problems and remedy them before they can cause damage to your organs, body, and health. A most powerful antioxidant derived from grape seeds is used in WARUR's Oxi-Warrior antioxidant formulation.

WARUR's development of its proprietary grade of grape seed extract 95%, in this WARUR's formulation, makes it the most effective antioxidant available. It is safe to use with other medications and has no known side effects.

Research Indicates:

- Boosts the immune system for a better response
- Improves circulation in the vessels and airways
- Improves breathing
- Reduces the effects of aging

Suggested Use:

Take 2 capsules per day, one morning and one evening

All WARUR Products are Electronically Energy Enhanced
